

# FHLBC Solutions

The Federal Home Loan Bank of Chicago (FHLBC) provides a wide range of lending solutions to meet your business needs. Loan growth at U.S. banks has exceeded deposit growth for 29 consecutive months and both business and consumer confidence levels are on the rise. Following a long period of deleveraging, households and businesses are now more willing to borrow, but even as the Fed has pledged to continue raising rates, net interest margins of depository institutions remain under pressure. The FHLBC can help you stay ahead in a competitive environment, no matter the structure of your loan portfolio.
