^a Short-term held-to-maturity securities, net, consists of investment securities with a maturity of less than 90 days when purchased.

Note 1 - Background and Basis of Presentation

The Federal Home Loan Bank of Chicago ^a is a federally chartered corporation and one of 12 Federal Home Loan Banks (the FHLBs) that, with the Office of Finance, comprise the Federal Home Loan Bank System (the System). The FHLBs are government-sponsored enterprises (GSE) of the United States of America and were organized under the Federal Home Loan Bank Act of 1932, as amended (FHLB Act), in order to improve the availability of funds to support home ownership. The FHLBs are regulated by the Federal Housing Finance Agency (FHFA), an independent federal agency. We provide credit to members principally in the form of secured loans called advances. We also provide liquidity for home mortgage loans to members approved as Participating Financial Institutions (PFIs) through the Mortgage Partnership Finance[®] (MPF[®]) Program ^b.

Our accounting and financial reporting policies conform to generally accepted accounting principles in the United States of America (GAAP). Amounts in prior periods may be reclassified to conform to the current presentation and if material are disclosed in the following notes.

In the opinion of management, all normal recurring adjustments have been included for a fair statement of this interim financial information. These unaudited financial statements and the following footnotes should be read in conjunction with the audited financial statements and footnotes for the year ended December 31, 2014, included in our Annual Report on Form 10-K (2014 Form 10-K) starting on page F-1, as filed with the SEC.

Use of Estimates

The preparation of financial statements in accordance with GAAP requires us to make assumptions and estimates that may affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities, and the reported amounts of income and expense. The most significant of these assumptions and estimates apply to the following:

- Fair value measurements;
- · Determination of other-than-temporary impairments of securities; and
- · Allowance for credit losses.

Actual results could differ from these assumptions and estimates.

Consolidation of Variable Interest Entities

We do not consolidate any of our investments in variable interest entities since we are not the primary beneficiary. We classify variable interest entities as investment securities in our statements of condition. Such investment securities include, but are not limited to, senior interests in private label mortgage backed securities (MBS) and Federal Family Education Loan Program - asset backed securities (FFELP ABS).

The carrying amount for these investment securities is driven by our investment intent - that is, whether we hold the investment security as held-to-maturity, available-for-sale or trading. We have no liabilities related to these investments in variable interest entities. We have not provided financial or other support (explicitly or implicitly) to these investment securities that we were not previously contractually required to provide nor do we intend to provide such support in the future. Our maximum loss exposure for these investment securities is limited to their carrying amounts.

Gross versus Net Presentation of Financial Instruments

We present our derivative assets and liabilities on a net basis in our statements of condition. GAAP requires disclosure of both gross information and net information related to derivatives, repurchase agreements and reverse repurchase agreements, and securities borrowing or lending transactions regardless of whether we offset these transactions in our statements of condition. For the periods presented to date, these rights of offset only apply to our derivatives.

Note 2 - Summary of Significant Accounting Policies

Our **Summary of Significant Accounting Policies** through December 31, 2014, can be found in our 2014 Form 10-K starting on page F-10. We adopted the following policies in 2015:

Asset Classification and Charge-off Provisions

On April 9, 2012, the FHFA issued Advisory Bulletin 2012-02, Framework for Adversely Classifying Loans, Other Real Estate Owned, and Other Assets and Listing Assets for Special Mention (AB 2012-02). The guidance in AB 2012-02 is generally consistent with the Uniform Retail Credit Classification and Account Management Policy issued by the federal banking regulators in June 2000. AB 2012-02 establishes a standard and uniform methodology for classifying assets, prescribes the timing of asset charge-offs (excluding investment securities), and provides measurement guidance with respect to determining our allowance for credit losses, and fair value measurement guidance for conventional MPF Loans that are classified as Substandard, Doubtful, or Loss, and Real Estate Owned (REO) related to conventional MPF Loans. Subsequent to the issuance of AB 2012-02, the FHFA issued interpretative guidance clarifying that implementation of the asset classification framework may occur in two phases. We implemented the asset classification provisions effective January 1, 2014. We prospectively adopted the remaining provisions of AB 2012-02 on January 1, 2015. The effect of implementing the remaining provisions was as follows:

- The AB 2012-02 allowance for credit losses measurement guidance did not have a material effect on our financial condition, results of operations, or cash flows at the time of adoption.
- We recorded a \$10 million charge-off to our allowance for credit losses on MPF Loans to conform our charge-off policies to AB 2012-02. In particular, we now write-down a conventional MPF Loan to its fair value less estimated selling costs when such a loan is classified as "Loss" and when a conventional MPF Loan is transferred to REO. Our prior practice was to record a charge-off when a conventional MPF Loan was transferred to REO. Exposures classified "Loss" are considered uncollectible and of such little value that the exposures continuance as a balance sheet asset is not warranted. This classification does not mean that the exposure has absolutely no recovery or salvage value; rather, it is not practical or desirable to defer charging off this asset, even though partial recovery may occur in the future. Examples of confirming events indicating that a "Loss" exists include, but are not limited to, the following:
 - A current assessment of value is made before a single family residential loan is more than 180 days past due. Any outstanding loan balance in excess of the fair value of the property, less cost to sell, is classified as "Loss" when the loan is no more than 180 days delinquent.
 - When a borrower is in bankruptcy, loans are written down to the fair value of the collateral, less costs to sell, within 60 days of receipt of the notification of filing from the bankruptcy court or within the delinquency time frames specified in the guidance, whichever is shorter.
 - Fraudulent loans, not covered by any existing representations and warranties in the loan purchase agreement, are charged off within 90 days of discovery of the fraud, or within the delinquency time frames specified in the adverse classification guidance, whichever is shorter.
- We began using an Automated Valuation Methodology (AVM) to determine the fair value of our impaired conventional MPF Loans held in portfolio and REO. Our prior practice was to determine fair value using broker price opinions, if available, to measure impaired conventional MPF Loans held in portfolio and REO. If a current broker price opinion was not available, we estimated fair value based on our current actual loss severity rates we experienced on sales, excluding any estimated selling costs. The use of AVM's to determine fair value may result in increased volatility with respect to our provision for credit losses.
- We now place a conventional MPF Loan held in portfolio on nonaccrual when it is adversely classified as either "Substandard," "Doubtful", or "Loss". An adverse classification means that such a loan is not considered well secured and in the process of collection. Exposures classified "Substandard" are inadequately protected by the current worth and paying capacity of the obligor or by the collateral pledged, if any. Exposure so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the exposure. These weaknesses are characterized by the distinct possibility that we will sustain some loss if the deficiencies are not corrected. Exposures classified "Doubtful" have all the weaknesses inherent in those exposures classified "Substandard" with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently known facts, conditions and values, highly questionable and improbable. Our prior practice was to place conventional MPF Loans held in portfolio on nonaccrual when the loan was 90 or more days past due (or 60 days past due in the case of a bankruptcy) and the loan was not well-secured and in the process of collection. This change in nonaccrual practice did not have a material effect on our nonaccrual loans outstanding at the time of adoption.

Classification of Certain Government-Guaranteed Mortgage Loans upon Foreclosure

In August of 2014, the FASB issued new guidance that requires certain government-guaranteed mortgage loans to be derecognized upon foreclosure and established as a separate receivable. Specifically, such accounting treatment is applied to a government-guaranteed mortgage loan in which the loan guarantee is not separable from the loan prior to foreclosure, the creditor has the intent to make a claim on the guarantee and the ability to recover under the claim, and at the time of foreclosure any amount of the claim that is determined on the basis of the fair value of the real estate is fixed. We prospectively adopted this new guidance on January 1, 2015 for our government MPF Loans. Specifically, our foreclosed government MPF Loans meet the conditions specified by the new guidance and will be classified as a receivable rather than REO. The new guidance did not have a material effect on our operating activities or our financial statements since our credit risk on government MPF Loans is limited to whether or not the servicing PFI fails to pay for losses not covered by Federal Housing Administration (FHA) insurance, or Department of Veteran Affairs (VA), Department of Housing and Urban Development (HUD) or Department of Agriculture Rural Housing Service (RHS) guarantees. Our foreclosed government MPF Loans were previously classified in REO in Other Assets.

Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure

In January of 2014, the FASB issued new accounting guidance clarifying that consumer mortgage loans collateralized by real estate should be reclassified to REO when either the creditor obtains legal title to the residential real estate property upon completion of a foreclosure or the borrower conveys all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar legal agreement. We adopted the new guidance effective January 1, 2015, on a prospective basis. The new guidance is consistent with our previous accounting and did not have an effect on our operating activities or financial statements.

Held for Sale Mortgage Loans

We classify MPF Xtra, MPF Direct, and government mortgage loans obtained for a Ginnie Mae securitization transaction as mortgage loans held for sale (HFS), as we intend to sell such loans in an outright sale or in a securitization transaction. If material, HFS mortgage loans will be classified as a separate line item in our statements of condition; otherwise, we will classify HFS mortgage loans in Other Assets. We have elected the fair value option for HFS mortgage loans. Since these HFS mortgage loans are carried at fair value, the loans do not require an allowance for credit losses. We measure the fair value of HFS mortgage loans based on to-be-announced (TBA) securities, which represent quoted market prices for new mortgage-backed securities issued by U.S. government sponsored enterprises. Any initial premium or discount is recognized as part of the fair value measurement process rather than amortized as a yield adjustment. Any transaction fees, such as extension fees, or costs are immediately recognized into other noninterest income. HFS mortgage loans are classified as an operating activity within our statements of cash flows.

Note 3 - Recently Issued but Not Yet Adopted Accounting Standards

Simplifying the Presentation of Debt Issuance Cost

In April of 2015, the FASB issued new guidance requiring us to present concession fees in our statements of condition as a direct deduction from the carrying amount of the related debt liability similar to debt discounts or premiums. Our current practice is to classify concession fees (i.e., debt issuance costs) in Other Assets. The new guidance becomes effective for annual and interim periods within those annual periods beginning after December 15, 2015 with earlier adoption permitted. The new guidance requires us to apply the new guidance retrospectively to all periods presented in our financial statements. We expect to adopt the new guidance January 1, 2016. The new guidance is not expected to have a material effect on our financial statements but may effect the effective yield on our outstanding debt since directly deducting concession fees from the related debt would reduce the average carrying amount of our debt outstanding thereby increasing the effective interest rate on our outstanding debt.

Amendments to Consolidation Analysis

In February of 2015, the FASB issued amended guidance concerning consolidation analysis. The new guidance is intended to enhance consolidation guidance for legal entities such as limited partnerships, limited liability corporations, and securitization structures (collateralized debt obligations, collateralized loan obligations, and mortgage-backed security transactions). The new guidance will be effective for periods beginning after December 15, 2015. Early adoption is permitted, including adoption in an interim period. We do not expect the new guidance to affect our financial condition, results of operations, or cash flows.

Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern

In August of 2014, the FASB issued guidance that requires an entity's management to assess the entity's ability to continue as a going concern. Specifically, for each annual and interim reporting period, an entity's management should evaluate whether there are conditions or events, considered in the aggregate, that raise "substantial doubt" about the entity's ability to continue as a going concern. Substantial doubt about an entity's ability to continue as a going concern exists when relevant conditions and events, considered in the aggregate, indicate that it is probable that the entity is unable to meet its obligations as they become due within one year after the date that the financial statements are issued. The guidance becomes effective for the interim and annual periods ending after December 15, 2016, and early application is permitted. This guidance is not expected to have any effect on our financial condition or results of operations at the time of adoption.

Revenue from Contracts with Customers

In May of 2014, the FASB issued new guidance governing revenue recognition from contracts with customers. Financial instruments and other contractual rights within the scope of other GAAP guidance are excluded from the scope of this new revenue recognition guidance. In this regard, it is expected that a majority of our contracts with members would be excluded from the scope of this new guidance. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled, in exchange for those goods or services. To achieve that core principle, an entity should apply the following steps:

- Step 1: Identify the contract(s) with a customer.
- Step 2: Identify the performance obligations in the contract.
- Step 3: Determine the transaction price.
- Step 4: Allocate the transaction price to the performance obligations in the contract.
- Step 5: Recognize revenue when (or as) the entity satisfies a performance obligation.

The new revenue recognition guidance becomes effective for annual interim reporting periods beginning January 1, 2017. We are in the process of reviewing our contracts with members to determine the effect, if any, on our operating activities and financial statements.

Note 4 - Interest Income and Interest Expense

The following table presents interest income and interest expense for the periods indicated:

	Three mon	ths e	nded March	31,
	2015		2014

	-	_		_

Note 5 - Investment Securities

Our major security types presented in the tables below are defined as follows:

- U.S. Government & other government related may consist of the sovereign debt of the United States; debt issued by Fannie Mae, Freddie Mac, and the Federal Farm Credit Banks Funding Corporation; and non-mortgage-backed securities of the Small Business Administration and Tennessee Valley Authority.
- Federal Family Education Loan Program asset backed securities (FFELP ABS).
- Government Sponsored Enterprises (GSE) residential mortgage-backed securities (MBS) issued by Fannie Mae and Freddie Mac.
- Government-quaranteed residential, multifamily, and reverse mortgage MBS.
- Private-label residential MBS.
- · State or local housing agency obligations.

Pledged Collateral

We transact most of our derivatives with large banks and major broker-dealers. Derivative transactions may be entered into either through an over-the-counter bilateral agreement with an individual counterparty or through a Futures Commission Merchant (FCM or clearing member) with a derivatives clearing organization (clearinghouse). We may pledge investment securities as collateral under these agreements, and in such cases, the amount pledged will be noted on the face of the statements of condition. We pledged \$76 million of investment securities as collateral for our initial margin with derivative clearing organizations as of March 31, 2015, and \$71 million as of December 31, 2014. See **Note 9 - Derivatives and Hedging Activities** for further details.

Trading Securities

The following table presents the fair value of our trading securities. We had no material gains or losses realized from the sales of trading securities.

As of	March 31, 2015		December 31, 2014
U.S. Government & other government related	\$ 10	I \$	102
Residential MBS:			
GSE	5)	63
Government-guaranteed	:	2	2
Total Residential MBS	6	ī	65
Trading securities	\$ 16	2 \$	167

At March 31, 2015, and 2014, we had net year-to-date unrealized gains (losses) of \$(1) million and \$(5) million on trading securities still held at period end.

Total	\$ 7,382	\$	(264)	\$	7,118	\$	708	\$	(2)	\$	7,824

We had no sales of HTM securities for the periods presented.

Aging of Unrealized Temporary Losses

The following tables present unrealized temporary losses on our AFS and HTM portfolio for periods less than 12 months and for 12 months or more. We recognized no OTTI charges on these unrealized loss positions because we expect to recover the entire amortized cost basis, we do not intend to sell these securities, and we believe it is more likely than not that we will not be required to sell them prior to recovering their amortized cost basis. In the tables below, in cases where the gross unrealized losses for an investment category are less than \$1 million, the losses are not reported.

Total securities	\$	18,411	\$	19,449	\$	6,223	\$	6,932		

Other-Than-Temporary Impairment Analysis

Significant Inputs Used to Determine OTTI

Our analysis for OTTI on our private-label MBS includes key modeling assumptions, significant inputs, and methodologies provided by an FHLB System OTTI Committee. We use the information provided to generate cash flow projections used in analyzing credit losses and determining OTTI for private-label MBS. The OTTI Committee was formed by the FHLBs to achieve consistency among the FHLBs in their analyses of the OTTI of private-label MBS. We are responsible for making our own determination of impairment, which includes determining the reasonableness of assumptions, significant inputs, and methodologies used, and performing the required present value calculations using appropriate historical cost bases and yields.

As of March 31, 2015, we had a short-term housing price forecast with projected changes ranging from -3.0% to +8.0% over the twelve month period beginning January 1, 2015 for all markets. For the vast majority of markets, the short-term forecast has changes ranging from +1.0% to +5.0%. Previously, long-term home price projections following the short-term period were projected to recover using one of five different recovery paths. Starting with the second quarter of 2014, a unique path was projected for each geographic area based on an internally developed framework derived from historical data.

Based on these inputs and assumptions, we had no OTTI charges for the three months ended March 31, 2015, and 2014.

The following table presents the changes in the cumulative amount of credit losses (recognized into earnings) on OTTI investment securities for the periods stated.

	Т	Three months ended March 31,					
	2	2015	2014				
Beginning Balance	\$	620	\$	677			
Reductions:							
Increases in cash flows expected to be collected that have been recognized as accretion income into interest income		(15)		(14)			
Ending Balance	\$	605	\$	663			

Note 6 - Advances

We offer a wide range of fixed- and variable-rate advance products with different maturities, interest rates, payment characteristics and optionality. The following table presents our advances by callable/putable features:

As of	March	31, 2015	December 31, 2014		
Noncallable/nonputable	\$	29,093	\$	29,666	
Callable		961		964	
Putable		1,643		1,673	
Total par value		31,697		32,303	
Hedging adjustments		223		166	
Other adjustments		21		16	
Total advances	\$	31,941	\$	32,485	

The following table presents our advances by redemption terms:

As of March 31, 2015	Α	mount	Weighted Average Interest Rate	urity or Call late	Next Maturity or Put Date			
Due in one year or less	\$	6,628	0.51%	\$ 7,540	\$	7,834		
One to two years		2,568	2.15%	2,368		2,112		
Two to three years		4,369	1.09%	3,984		3,730		
Three to four years		8,989	0.33% ^a	8,689		8,908		
Four to five years		6,861	0.29% ^a	6,839		6,872		
More than five years		2,282	2.31%	2,277		2,241		
Total par value	\$	31,697	0.75%	\$ 31,697	\$	31,697		

The weighted average interest rate is relatively lower when compared to other categories due to a majority of advances in this category consisting of variable rate advances which reset periodically at current interest rates.

We lend to members within our district according to federal statutes, including the FHLB Act, and FHFA regulations. The FHLB Act requires us to obtain sufficient collateral to fully secure our advances, and we do not expect to incur any credit losses on advances. We perfect our security interest in pledged collateral and enter into control agreements for securities collateral. We take a risk-based approach in requiring delivery of pledged collateral. We have policies and procedures in place that are designed to manage our credit risk, including requirements for restrictions on borrowing, verifications of collateral and monitoring of borrowings and the borrower's financial condition. Based on the collateral pledged as security for advances and our credit analyses of our borrowers' financial condition and our credit extension and collateral policies, we expect to collect all amounts due according to the contractual terms of our advances. See **Note 8 - Allowance for Credit Losses** for information related to our credit risk on advances and allowance methodology for credit losses.

Note 7 - MPF Loans

The following table presents information on MPF Loans held in our portfolio by contractual maturity at the time of purchase. All are fixed-rate. Government is comprised of loans insured by the FHA and loans guaranteed by the VA, HUD or RHS.

As of	March 31, 2015	December 31, 2014		
Medium term (15 years or less)	\$ 971	\$	1,094	
Long term (greater than 15 years)	4,692		4,905	
Total unpaid principal balance	5,663		5,999	
Net premiums, credit enhancement and deferred loan fees	22		23	
Hedging adjustments	47		50	
Total before allowance for credit losses	5,732		6,072	
Allowance for credit losses on MPF Loans	(4)		(15)	
Total MPF Loans held in portfolio, net	\$ 5,728	\$	6,057	
Conventional mortgage loans	\$ 4,323	\$	4,619	
Government insured mortgage loans	1,340		1,380	
Total unpaid principal balance	\$ 5,663	\$	5,999	

See **Note 8 - Allowance for Credit Losses** for information related to our credit risk on MPF Loans and allowance for credit losses methodology.

In addition to our portfolio MPF products, PFIs sell eligible MPF Loans to us through the MPF Program infrastructure and we concurrently sell them to Fannie Mae under the MPF Xtra product and to third party investors under the MPF Direct product. Under our MPF Government MBS product, PFIs sell us Government Loans that we intend to hold in our portfolio for a short period of time until such loans are pooled into Ginnie Mae MBS. Other MPF Banks that offer these three products allow their PFIs to sell MPF Loans directly to us. For the period ending March 31, 2015, we held an immaterial amount of MPF Loans held for sale, recorded in Other Assets in our statements of condition. See **Note 2 - Summary of Significant Accounting Policies** for information related to our accounting for MPF Loans that are held for sale.

Note 8 - Allowance for Credit Losses

We have established an allowance methodology for each of our portfolio segments:

- member credit products (advances, letters of credit and other extensions of credit to borrowers);
- · conventional MPF Loans held for portfolio;
- · government MPF Loans held for portfolio; and
- term Federal Funds sold and term securities purchased under agreements to resell.

For detailed information on these methodologies and our accounting policies please see **Note 8 - Allowance for Credit Losses** to the financial statements in our 2014 Form 10-K. Any updates to these accounting policies are noted below.

Member Credit Products

For the periods presented, we had no credit products that were past due, on nonaccrual status, or considered impaired. In addition, there have been no troubled debt restructurings related to our credit products during the periods then ended. Based upon the collateral we held as security, our credit extension and collateral policies, our credit analysis and the repayment history on credit products, we do not believe that any credit losses have been incurred on our credit products; accordingly, we have not recorded any allowance for credit losses for our credit products. Additionally, no liability was recorded to reflect an allowance for credit losses for our credit products with off-balance sheet credit exposures.

Conventional MPF Loans

MPF Risk Sharing Structure

We share the risk of credit losses on conventional MPF Loan products held in portfolio with our PFIs by structuring potential losses on conventional MPF Loans into layers with respect to each master commitment (MC). The credit risk analysis determines the degree to which layers of the MPF Risk Sharing Structure are available to recover losses on MPF Loans. PFIs deliver MPF Loans into pools designated by product specific MCs. The credit risk analysis is performed at an individual MC level as loss recovery is MC-specific and no risk layer can be applied across a PFI's MCs. With respect to participation interests in MPF Loans, losses are allocated amongst the participating MPF Banks pro-ratably based upon their respective percentage participation interest in the related MC. For further detail of our **MPF Risk Sharing Structure** see page F-31 in our 2014 Form 10-K.

The following table presents the changes in the allowance for credit losses on conventional MPF Loans.

	Fo	For the three months ended							
	March	31, 2015	March 31, 2014						
Balance, beginning of period	\$	15	\$	29					
Losses charged to the allowance		(11)		(2)					
Provision for (reversal of) credit losses		_		(3)					
Balance, end of period	\$	4	\$	24					

The following table presents the recorded investment by impairment methodology on conventional MPF Loans.

As of	Mar	ch 31, 2015	December 31, 2014		
Specifically identified and individually evaluated for impairment	\$	_	\$	12	
Homogeneous pools of loans and collectively evaluated for impairment		4		3

Collectively evaluated for impairment		4,252		4,538	
Total recorded investment	\$	4,396	\$	4,698	

Government MPF Loans Held in Portfolio

The PFI provides and maintains insurance or a guaranty from governmental agencies, which includes ensuring compliance with all of their requirements, and obtaining the benefit of the applicable insurance or guaranty with respect to defaulted government MPF Loans. Any losses incurred on government MPF Loans that are not recovered from the government insurer or guarantor are absorbed by the servicing PFI. Accordingly, our credit risk on government MPF Loans is limited to whether or not the servicing PFI fails to pay for losses not covered by FHA insurance, or VA, HUD or RHS guarantees. In this regard, based on our assessment of the servicing PFIs, we did not establish an allowance for credit losses for our government MPF Loan portfolio as of the periods presented. Further, due to the government guarantee or insurance and the servicing PFIs ability to absorb losses, government MPF Loans are not placed on nonaccrual status or disclosed as troubled debt restructurings.

Credit Quality Indicators - MPF Loans

The table below summarizes our recorded investment in MPF Loans by our key credit quality indicators. Serious delinquency rate is defined as 90 days or more past due or in the process of foreclosure, as a percentage of the total recorded investment. Past due 90 days or more still accruing interest is defined as MPF Loans that are either government guaranteed or conventional mortgage loans that are well secured (by collateral that have a realizable value sufficient to discharge the debt or by the guarantee or insurance, such as PMI, of a financially responsible party) and in the process of collection.

		N	31, 2015		December 31, 2014

Troubled Debt Restructurings

As of March 31, 2015 and December 31, 2014, our recorded investment balances of mortgage loans classified as troubled debt restructurings were \$68 million and \$73 million, respectively. The financial amounts related to troubled debt restructurings are not material to our financial condition, results of operations, or cash flows.

Individually Evaluated Impaired Loans

The following table summarizes the recorded investment, unpaid principal balance, and related allowance of impaired MPF Loans individually assessed for impairment, which includes impaired collateral dependent MPF Loans and troubled debt restructurings. As of March 31, 2015, we did not have an allowance for our impaired MPF Loans. For further details see **Note 2 - Summary of Significant Accounting Policies** to the financial statements.

As of	March 31	, 2015	December 31, 2014
Recorded investment with an allowance	\$	_	\$ 160
Recorded investment without an allowance		144	_
Unpaid principal balance with an allowance		_	158
Unpaid principal balance without an allowance		152	_
Related allowance		_	12

The following table summarizes the average recorded investment of impaired conventional MPF Loans. No interest income was recognized on impaired loans.

	For the three	months ended		
	March 31, 2015	March 31, 2014		
Average recorded investment with an allowance	* * -	\$ 204		
Average recorded investment without an allowance	148	_		

Term Federal Funds Sold and Term Securities Purchased Under Agreements to Resell

Federal Funds sold are only evaluated for purposes of an allowance for credit losses if payment is not made when due. In this regard, all Federal Funds sold were repaid according to their contractual terms. We did not establish an allowance for credit losses for Securities Purchased Under Agreements to Resell since all payments due under the contractual terms have been received and because we hold sufficient underlying collateral.

Note 9 - Derivatives and Hedging Activities

Refer to **Note 2 - Summary of Significant Accounting Polices** to the financial statements in our 2014 Form 10-K for our accounting policies for derivatives.

We transact most of our derivatives with large banks and major broker-dealers. Some of these banks and broker-dealers or their affiliates buy, sell, and distribute consolidated obligations. Derivative transactions may be entered into through an over-the-counter bilateral agreement with an individual counterparty. Additionally, we clear derivatives transactions through an FCM with a derivatives clearing organization (clearinghouse). We are not a derivatives dealer and do not trade derivatives for speculative purposes.

Managing Credit Risk on Derivative Agreements

We are subject to credit risk due to the risk of nonperformance by counterparties to our derivative agreements. For bilateral derivative agreements, the degree of counterparty risk depends on the extent to which master netting arrangements are included in such contracts to mitigate the risk. We manage counterparty credit risk through credit analysis, collateral requirements and adherence to the requirements set forth in our policies and FHFA regulations. We require collateral agreements on all derivatives that establish collateral delivery thresholds. Additionally, collateral related to derivatives with member institutions includes collateral assigned to us, as evidenced by a written security agreement, and held by the member institution for our benefit. Based on credit analyses and collateral requirements, we do not anticipate any credit losses on our derivative agreements. See **Note 16 - Fair Value Accounting** to the financial statements in our 2014 Form 10-K for discussion regarding our fair value methodology for derivative assets and liabilities, including an evaluation of the potential for the fair value of these instruments to be affected by counterparty credit risk.

Our over-the-counter bilateral derivative agreements contain provisions that require us to post additional collateral with our counterparties if there is deterioration in our credit rating, except for those derivative agreements with a zero unsecured collateral threshold for both parties, in which case positions are required to be fully collateralized regardless of credit rating. If our credit rating is lowered by a major credit rating agency, such as Standard and Poor's or Moody's, we would be required to deliver additional collateral on derivatives in net liability positions. If our credit rating had been lowered from its current rating to the next lower rating, we would have been required to deliver up to an additional \$32 million of collateral at fair value to our derivatives counterparties at March 31, 2015.

Cleared swaps are subject to initial and variation margin requirements established by the clearinghouse and its clearing members. We post initial and variation margin through the clearing member, on behalf of the clearinghouse, which could expose us to institutional credit risk in the event that a clearing member or the clearinghouse fail to meet their obligations. Clearing derivatives through a clearinghouse mitigates counterparty credit risk exposure because a central clearinghouse counterparty is substituted for individual counterparties and collateral is posted daily for changes in the value of cleared derivatives through an FCM. The clearinghouse determines initial margin requirements for cleared derivatives. In this regard, clearing agents may require additional initial margin to be posted based on credit considerations, including but not limited to, credit rating downgrades. We were not required to post additional initial margin by our clearing agents at March 31, 2015.

We present our derivative assets and liabilities on a net basis in our statements of condition. Refer to **Note 1 - Background and Basis of Presentation** and **Note 2 - Summary of Significant Accounting Policies** to the financial statements in our 2014 Form 10-K for further discussion. In addition to the cash collateral as noted in the following table, we also pledged \$76 million of investment securities at March 31, 2015, of which \$76 million can be sold or repledged, as part of our initial margin related to cleared derivative transactions.

The following table presents our gross and net derivative assets and liabilities by contract type and amount for our derivative agreements.

	March 31, 2015							De	ecember 31, 2014					
As of	Notional Amount			vative sets			Notional Amount		Derivative Assets			rivative bilities

Gross derivative amount before adjustments	\$	60,335		794		1,807	\$	53,400		704		1,680		
Netting adjustments and cash collateral		 :		(786) ^a		(1,762)				(675) ^a		(1,625) a		
Derivatives on statements of condition			\$	8	\$	45			\$	29	\$	55		

^a Amounts represent the application of the netting requirements that allow us to settle positive and negative positions and also cash collateral and related accrued interest held or placed by us with the same clearing agent and/or counterparty. Cash collateral posted was \$1.0 billion at March 31, 2015, and \$978 million at December 31, 2014. Cash collateral received was \$55 million at March 31, 2015, and \$29 million at December 31, 2014.

The following table presents our gross recognized amount of offsetting derivative assets and liabilities for derivatives with legal right of offset as well as derivatives without the legal right of offset. Any over-collateralization received by or paid from us to an individual clearing member and/or at a counterparty arrangement level is not included in the determination of the net amount. Specifically, any such over-collateralization amount received by us is not offset against another derivative asset counterparty exposure for which there is no legal right of offset, while any over-collateralization delivered by us is not offset against another derivative liability counterparty exposure for which there is no legal right of offset.

	Derivative Assets							Derivative Liabilities

Represents the effect of net interest settlements attributable to open derivative hedging instruments on net interest income. The effect of derivatives on net interest income is included in the interest income/expense line item of the respective hedged item type.

Amortization of hedge adjustments is included in the interest income/expense line item of the respective hedged item type.

Cash Flow Hedges

The following table presents our gains (losses) on our cash-flow hedging relationships recorded in income and other comprehensive income (loss). In cases where amounts are insignificant in the aggregate, we do not report a balance.

	Amortization of Effective Portion Reclassified From AOCI to Interest		R Fr Dei	neffective Portion eclassified om AOCI to rivatives and Hedging Activities	F	Total Reclassified From AOCI to Statements of Income	let Change in Other omprehensive Income	Effective Portion Recorded in AOCI		Net Interest Settlements Classified in Net Interest Income

Discount notes - interest rate swaps		(1)		1		_	24	24		(61) ^a
Total	\$	2	\$	1	\$	3	\$ 21	\$ 24	\$	(61) ^a

^a Represents the effect of net interest settlements attributable to open derivative hedging instruments on net interest income. The effect of derivatives on net interest income is included in the interest income/expense line item of the respective hedged item type.

There were no amounts reclassified from AOCI into earnings for the periods presented as a result of the discontinuance of cash-flow hedges because the original forecasted transactions failed to occur by the end of the originally specified time period or within a two-month period thereafter. The deferred net gains (losses) on derivative instruments in AOCI that are expected to be reclassified to earnings during the next twelve months were \$(1) million as of March 31, 2015. The maximum length of time over which we are hedging our exposure to the variability in future cash flows for forecasted transactions, excluding those forecasted transactions related to the payment of variable interest on existing financial instruments, is 5 years.

Note 10 - Consolidated Obligations

The FHLBs issue consolidated obligations through the Office of Finance as their agent. Consolidated obligations consist of discount notes and consolidated obligation bonds. Consolidated discount notes are issued primarily to raise short-term funds. Discount notes are issued at less than their face amount and redeemed at par value when they mature. The maturity of consolidated bonds range from less than one year to over 20 years, but they are not subject to any statutory or regulatory limits on maturity.

The following table presents our consolidated obligation bonds, for which we are the primary obligor, including callable bonds that are redeemable in whole, or in part, at our discretion on predetermined call dates.

As of March 31, 2015	Contractual Maturity	Weighted Average Interest Rate	В	By Next Maturity or Call Date
Due in one year or less	\$ 2,190	3.00%	\$	23,807
One to two years	3,795	2.44%		2,898
Two to three years	8,074	1.94%		2,834
Three to four years	3,907	1.17%		980
Four to five years	6,599	1.56%		1,374
Thereafter	8,540	2.49%		1,212
Total par value	\$ 33,105	2.04%	\$	33,105

The following table presents our consolidated obligation discount notes for which we are the primary obligor. All are due in one year or less.

As of	March 31, 2015	Dec	ember 31, 2014
Carrying Amount	\$ 30,474	\$	31,054
Par Value	30,486		31,060
Weighted Average Interest Rate	0.11%	6	0.09%

The following table presents consolidated obligation bonds outstanding by call feature:

As of	Marc	ch 31, 2015	December 31,	2014
Noncallable	\$	10,763	\$ 1	1,046
Callable		22,342	2	3,355
Par value		33,105	3	4,401
Bond premiums (discounts), net		15		17
Hedging adjustments		(93)		(177)
Fair value option adjustments		16		10
Total consolidated obligation bonds	\$	33,043	\$ 3	4,251

Joint and Several Liability

We do not expect to pay any additional amounts on behalf of other FHLBs under our joint and several liability as of March 31, 2015. As a result, we did not accrue a liability for our joint and several liability related to the other FHLBs' share of the consolidated obligations as of March 31, 2015 and December 31, 2014.

The following table summarizes the consolidated obligations of the FHLBs and those for which we are the primary obligor:

	N	March 31, 201	5	December 31, 2014					
Par values as of	Bonds	Discount Notes	Total	Bonds	Discount Notes	Total			
FHLB System total consolidated obligations	\$ 459,021	\$ 353,175	\$ 812,196	\$ 484,812	\$ 362,363	\$ 847,175			
FHLB Chicago as primary obligor	33,105	30,486	63,591	34,401	31,060	65,461			
As a percent of the FHLB System	7%	9%	8%	7%	9%	8%			

Note 11 - Capital

Under our Capital Plan our stock consists of two sub-classes of stock, Class B1 activity stock and Class B2 membership stock (together, Class B stock), both with a par value of \$100 and redeemable on five years' written notice, subject to certain conditions. Under the Capital Plan, each member is required to own capital stock in an amount equal to the greater of a membership stock requirement or an activity stock requirement. Class B1 activity stock is available for purchase only to support a member's activity stock requirement. Class B2 membership stock is available to be purchased to support a member's membership stock requirement and any activity stock requirement.

Minimum Capital Requirements

For details on our minimum capital requirements, including how the ratios below were calculated, see **Minimum Capital Requirements** on page F-44 of our 2014 Form 10-K. We complied with our minimum regulatory capital requirements as shown below:

		March	31, 2	015		Decembe	r 31,	31, 2014		
	Re	equirement		Actual	Requirement			Actual		
Risk-based capital	\$	1,135	\$	4,416	\$	1,127	\$	4,317		
Total regulatory capital	\$	2,806	2,806 \$ 4,416				\$	4,317		
Total regulatory capital ratio		4.00%)	6.29%		4.00%		6.01%		
Leverage capital	\$	3,507	3,507 \$ 6,623		\$ 3,592		\$	6,475		
Leverage capital ratio		5.00% 9.44%			5.00%			9.01%		

Total regulatory capital and leverage capital do not include accumulated other comprehensive income (loss). Under the FHFA regulation on capital classifications and critical capital levels for the FHLBs, we are adequately capitalized.

Note 12 - Accumulated Other Comprehensive Income (Loss)

The following table summarizes the income (loss) in AOCI for the periods indicated:

Note 13- Fair Value Accounting

For accounting policies regarding fair values see **Note 2 - Summary of Significant Accounting Policies** to the financial statements in our 2014 Form 10-K. For a description of the valuation techniques and significant inputs see **Note 16 - Fair Value Accounting** to the financial statements in our 2014 Form 10-K. There has been one significant change in our valuation technique since then.

The fair values of all interest rate derivative agreements are netted by clearing member and/or by counterparty, including cash collateral received from or delivered to the counterparty. If these netted amounts are positive, they are classified as an asset, and if negative, they are classified as a liability. We generally use a midmarket pricing convention based on the bid-ask spread for fair-value measurements. Because these estimates are made at a specific point in time, they are susceptible to material near-term changes. We evaluated the potential for the fair value of the instruments to be affected by changes in our counterparty credit risk and our own credit risk, and we made no adjustments as they were insignificant to the overall fair-value measurements. When midmarket pricing inputs are unavailable, we use a discounted cash-flow model which uses market-observable inputs (inputs that are actively quoted and can be validated to external sources), including the following:

 Discount rate assumption. At March 31, 2015 we used the overnight-index swap (OIS) curve and at December 31, 2014 we used the LIBOR swap curve.

We operationally implemented using the OIS curve to determine the fair value of derivative contracts in the first quarter of 2015. The initial effect of using the OIS curve did not have a material effect on our operating activities or financial statements.

The tables below are a summary of the fair value estimates and related levels in the fair value hierarchy. The carrying amounts are as recorded in the statements of condition. These tables do not represent an estimate of our overall market value as a going concern; as they do not take into account future business opportunities and future net profitability of assets and liabilities. The tables below are presented in the following order:

- Fair values of financial instruments.
- Financial instruments measured at fair value on a recurring basis on our statements of condition.
- Assets measured at fair value on a nonrecurring basis on our statements of condition.

We had no transfers between Levels 1, 2, and/or 3 for the periods presented.

a -				: <i>.</i>			

The netting adjustment amount includes cash collateral (either received or paid by us) and related accrued interest in cases where we have a legal right of setoff, by contract (e.g., master netting agreement) or otherwise, to discharge all or a portion of the debt owed to our counterparty by applying against the debt an amount that our counterparty owes to us. See **Note 9 - Derivatives and Hedging Activities** for further details.

b Amount represents debt carried at fair value under a full fair value hedge strategy, not at fair value under the fair value option.

Financial instruments carried at fair value on a recurring basis using Level 3 inputs were immaterial and there were no significant changes in balances in unobservable inputs (Level 3) in the three months ended March 31, 2015, or 2014.

Assets measured at fair value on a nonrecurring basis on our statements of condition

Assets that are not carried at fair value in our statements of condition may be required to be measured at fair value under certain circumstances. Examples include, but are not limited to, conventional MPF Loans that become impaired or REO that have declined in fair value during the reporting period. We measure such assets at fair value on a nonrecurring basis. Effective January 1, 2015, we began using an Automated Valuation Methodology (AVM) to determine the fair value of our impaired conventional MPF Loans and REO pursuant to the guidance provided by Advisory Bulletin 2012-02, Framework for Adversely Classifying Loans, Other Real Estate Owned, and Other Assets and Listing Assets for Special Mention (AB 2012-02). Refer to **Note 2 - Summary of Significant Accounting Policies** for further details. The table below presents assets that typically are not carried at fair value that were measured at fair value in our statements of condition as of the dates shown.

	Lev	Level 3						
As of	March 31, 2015	December 31, 2014						
Impaired conventional MPF Loans held in portfolio	\$ 155	\$ 150						
REO (recorded in Other Assets)	31	9						

Fair Value Option

We elected the fair value option for advances, discount notes, and consolidated obligation bonds for which hedge accounting treatment may not be achieved. Specifically, hedge accounting may not be achieved in cases where it may be difficult to pass prospective or retrospective effectiveness testing under derivative hedge accounting guidance even though the interest rate swaps used to hedge these financial instruments have matching terms. Accordingly, electing the fair value option allows us to better match the change in fair value of the advance, discount note, and short-term consolidated obligation bonds with the interest rate swap economically hedging it. We made no adjustments to the fair values of our instruments under the fair value option for credit risk as of the dates presented.

The following table summarizes the activity related to financial assets and liabilities for which we elected the fair value option.

		Ma	arch 31, 201	15	March 31, 2014					
			Conso Obli					solidated ligation		
	Advances		Bonds	Discount Notes		Advances	Bonds	Discount Notes

Contains \$981 million and \$974 million of member standby letters of credit at March 31, 2015, and December 31, 2014, which were renewable annually.

For a description of previously defined terms see **Note 17 - Commitments and Contingencies** to the financial statements in our 2014 Form 10-K.

Federal Home Loan Bank of Chicago Notes to Financial Statements - (Unaudited) (Dollars in millions except per share amounts unless otherwise indicated)

Note 15 - Transactions with Members and Other FHLBs

We define related parties as members that own 10% or more of our capital stock or members whose officers or directors also serve on our Board of Directors. Capital stock ownership is a prerequisite to transacting any member business with us. Members and former members own all of our capital stock. See **Note 11 - Capital** for further details.

In the normal course of business, we extend credit to or enter into other transactions with these related parties. All transactions are done at market terms that are no more favorable than the terms of comparable transactions with other members who are not considered related parties.

Members

The table below summarizes balances we had with our members as defined above as related parties (including their affiliates). Members represented in these tables may change between periods presented, to the extent that our related parties change, based on changes in the composition of our Board membership.

As of	March	31, 2015	Decem	ber 31, 2014
Assets - Interest bearing deposits	\$	560	\$	560
Assets - Advances		11,170		11,159
Assets - Advance Interest Receivable		3		2
Liabilities - Deposits		20		26
Equity - Capital Stock		268		267

Other FHLBs

From time to time, we may loan to, or borrow from, other FHLBs at market rates. These transactions are overnight, maturing the following business day. These and other transactions with other FHLBs, if any, are identified on the face of our **Financial Statements**.

b MPF off-balance sheet outstanding loans are not held on our statements of condition. These MPF Program loans are purchased from our PFIs or the PFIs of systemwide FHLBs and are concurrently resold to Fannie Mae or other third party investors under the MPF Xtra and MPF Direct programs. See **Mortgage Partnership Finance Program** beginning on page 7 in our 2014 Form 10-K.

Forward-Looking Information

Statements contained in this report, including statements describing the objectives, projections, estimates, or future predictions of management, may be "forward-looking statements." These statements may use forward-looking terminology, such as "anticipates," "believes," "expects," "could," "estimates," "may," "should," "will," their negatives, or other variations of these terms. We caution that, by their nature, forward-looking statements involve risks and uncertainties related to our operations and business environment, all of which are difficult to predict and many of which are beyond our control. These risks and uncertainties could cause actual results to differ materially from those expressed or implied in these forward-looking statements and could affect the extent to which a particular objective, projection, estimate, or prediction is realized. As a result, undue reliance should not be placed on such statements.

These forward-looking statements involve risks and uncertainties including, but not limited to, the following:

- changes in the demand by our members for advances, including the impact of the availability of other sources of funding for our members, such as deposits;
- limits on our investments in long-term assets;
- the impact of new business strategies, including our ability to develop and implement business strategies focused on
 maintaining net interest income; the impact of our efforts to simplify our balance sheet on our market risk profile and
 future hedging costs; our ability to successfully transition to a new business model, implement business process
 improvements and scale our size to our members' borrowing needs; the extent to which our members use our advances
 as part of their core financing rather than just as a back-up source of liquidity; and our ability to generate enough
 volume in new products to cover our costs related to developing such products;
- the extent to which amendments to our Capital Plan, including our ability to reduce capital stock requirements for certain future advance borrowings, and our ability to continue to pay enhanced dividends on our activity-based stock, impact borrowing by our members;
- our ability to meet required conditions to repurchase and redeem capital stock from our members (including maintaining compliance with our minimum regulatory capital requirements and determining that our financial condition is sound enough to support such repurchases), and the amount and timing of such repurchases or redemptions;
- general economic and market conditions, including the timing and volume of market activity, inflation/deflation, unemployment rates, housing prices, the condition of the mortgage and housing markets, increased delinquencies and/or loss rates on mortgages, prolonged or delayed foreclosure processes, and the effects on, among other things, mortgage-backed securities; volatility resulting from the effects of, and changes in, various monetary or fiscal policies and regulations, such as those determined by the Federal Reserve Board and Federal Deposit Insurance Corporation; impacts from various measures to stimulate the economy and help borrowers refinance home mortgages and student loans; disruptions in the credit and debt markets and the effect on future funding costs, sources, and availability;
- volatility of market prices, rates, and indices, or other factors, such as natural disasters, that could affect the value of our investments or collateral; changes in the value or liquidity of collateral securing advances to our members;
- changes in the value of and risks associated with our investments in mortgage loans, mortgage-backed securities, and FFELP ABS and the related credit enhancement protections;
- · changes in our ability or intent to hold mortgage-backed securities to maturity;
- · changes in mortgage interest rates and prepayment speeds on mortgage assets;

- membership changes, including the withdrawal of members due to restrictions on our dividends or the loss of members through mergers and consolidations; changes in the financial health of our members, including the resolution of some members; risks related to expanding our membership to include more institutions with regulators and resolution processes with which we have less experience;
- changes in investor demand for consolidated obligations and/or the terms of interest rate derivatives and similar
 agreements, including changes in the relative attractiveness of consolidated obligations as compared to other
 investment opportunities; changes in our cost of funds due to concerns over U.S. fiscal policy, and any related rating
 agency actions impacting FHLB consolidated obligations;
- political events, including legislative, regulatory, judicial, or other developments that affect us, our members, our counterparties and/or investors in consolidated obligations, including, among other things, the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) and related regulations and proposals and legislation related to housing finance and GSE reform; changes by our regulator and changes in the FHLB Act or applicable regulations as a result of the Housing and Economic Recovery Act of 2008 (Housing Act) or as may otherwise be issued by our regulator, including regulatory changes to FHLB membership requirements recently proposed by the FHFA; the potential designation of us as a nonbank financial company for supervision by the Federal Reserve;
- the ability of each of the other FHLBs to repay the principal and interest on consolidated obligations for which it is the primary obligor and with respect to which we have joint and several liability;
- the pace of technological change and our ability to develop and support technology and information systems, including our ability to protect the security of our information systems and manage any failures, interruptions or breaches in our information systems or technology services provided to us through third-party vendors;
- · our ability to attract and retain skilled employees;
- the impact of new accounting standards and the application of accounting rules, including the impact of regulatory guidance on our application of such standards and rules;
- the volatility of reported results due to changes in the fair value of certain assets and liabilities; and
- our ability to identify, manage, mitigate, and/or remedy internal control weaknesses and other operational risks.

For a more detailed discussion of the risk factors applicable to us, see Risk Factors in our 2014 Form 10-K on page 19.

These forward-looking statements are representative only as of the date they are made, and we undertake no obligation to update any forward-looking statement as a result of new information, future events, changed circumstances, or any other reason.

Executive Summary

First Quarter 2015 Financial Highlights

- We recorded net income of \$83 million for the first quarter of 2015, up slightly from \$81 million in the first quarter of 2014.
- Net interest income for the first quarter of 2015 was \$130 million, consistent with the first quarter of 2014 as the decline
 in our higher-earning investment and MPF Loan portfolios was offset by lower rates incurred on our debt.
- Total Investment Securities declined \$1.5 billion from \$27.3 billion at December 31, 2014, to \$25.8 billion at March 31, 2015, as the portfolio continued to pay down reflecting our current investment restriction which limits our ability to acquire longer-term investments.
- Advances outstanding were \$31.9 billion at March 31, 2015, down \$600 million from December 31, 2014.
- Total assets decreased \$1.7 billion during the first quarter of 2015, to \$70.1 billion at March 31, 2015.
- We reached \$2.48 billion in retained earnings at March 31, 2015.
- We remained in compliance with all of our regulatory capital requirements.

Summary and Outlook

The Federal Home Loan Bank of Chicago is a member-focused Bank oriented to support members in the communities they serve. Through an ongoing dialogue with our members, we've designed products and services to be responsive to their business needs. We have also used our increasingly strong capital position to permit each member to access and use the cooperative in a manner most appropriate for its business.

Last quarter, we increased the dividend on the activity-based stock to reward those members that do business with the Bank and, thereby, support the entire cooperative. We also reduced the membership stock requirement to lower members' cost of accessing the Bank and to free up capital for members that use the Bank primarily as a source of emergency liquidity. More than 600 of our members directly benefited from that reduced requirement this spring as we enabled them to request repurchase of their stock to redeploy the capital in their businesses and their communities.

On April 28, 2015, the Board of Directors maintained the dividend levels set last quarter by declaring a cash dividend at an annualized rate of 0.50% on Class B2 membership stock and at an annualized rate of 2.25% on Class B1activity stock, based on the Bank's preliminary financial results for the first quarter of 2015. The Board of Directors determined to pay a higher dividend per share on Class B1 activity stock than on Class B2 membership stock to recognize members that utilize Bank advances; this activity contributes to the overall health of the entire cooperative. The higher dividend, in effect, lowers members' cost of doing business with the Bank.

To assist members in accessing the secondary mortgage market, we have developed a suite of Mortgage Partnership Finance (MPF) products that will provide members with additional outlets for their housing loans, including high balance loans and government loans. Those programs are in full rollout and are available to all members.

Results of Operations

Net Interest Income

Net interest income is the difference between interest income that we receive on our interest earning assets and the interest expense we pay on interest bearing liabilities after accounting for the following in accordance with GAAP:

- · Net interest paid or received on interest rate swaps that are accounted for as fair value or cash flow hedges;
- · Amortization of premiums;
- · Accretion of discounts;
- · Amortization of hedge adjustments;
- · Advance prepayment fees; and
- · MPF credit enhancement fees.

The tables below present the increase or decrease in interest income and expense before the provision for credit losses due to volume or rate variances. Any change due to the combined volume/rate variance has been allocated ratably to volume and rate. The calculation of these components includes the following considerations:

- Average daily balances are computed using historical amortized cost balances except for items carried under the fair value option which include changes in fair value.
- MPF Loans held in portfolio that are on nonaccrual status are included in average daily balances used to determine the
 effective yield/rate.
- Interest and effective yield/rate includes all components of net interest income as discussed above. Yields/rates are calculated on an annualized basis.

Net interest income changed mainly due to the following:

- Investment interest income declined primarily due to the decline in average investment balances as securities matured or paid down. Our ability to make new investments that have a term to maturity in excess of 270 days is restricted. For further information, see **Investments** on page 12 in our 2014 Form 10-K. This decline is partially offset by accretion into interest income of expected improvements in the present value of cash flows on securities that were previously charged with credit related OTTI, resulting in an increase in the implied yield. For the three months ended March 31, 2015, we recorded accretion of \$15 million. For the comparable period in 2014, accretion was \$14 million. Future accretion is dependent upon how estimated market conditions may impact the projected cash flows, and may vary from past experience.
- Interest income from advances increased primarily due to increases in volume, which was partially the result of a Reduced Capitalization Advance Program (RCAP) where we lower the cost of borrowing by providing term advances at

a reduced capital stock requirement. See **Reduced Capitalization Advance Program** on page 54 in our 2014 Form 10-K for further information.

- Interest income from MPF Loans continued to decline as expected due to the decreased volume of MPF Loans outstanding.
- Interest expense decreased primarily as a result of a reduction in the average interest rates of our debt portfolio. As higher rate debt has matured or been called, the debt was replaced with lower-rate funding. Market rates on our short term discount notes also declined on average and we benefited from these lower rates by increasing the mix of discount notes as compared to bonds.

Net interest income is also impacted by fair value and cash flow hedging activity. For details see **Trading Securities**, **Derivatives and Hedging Activities**, and **Instruments Held at Fair Value Option** below.

Noninterest gain (loss)	\$	(5)	\$ (10)		

Other, net

Included in Other, Net is a fee we earned as the master servicer for other FHLBs participating in the MPF Program. These amounted to \$3 million and \$2 million for the three months ended March 31, 2015 and 2014.

Trading Securities, Derivatives and Hedging Activities, and Instruments Held Under Fair Value Option

Gains (losses) on these activities have stabilized in recent quarters primarily as a result of less volatile hedging costs, which is consistent with hedging strategies of our more simplified balance sheet, along with a more stable economy.

Most of our total net effect from hedging activities was recorded as a component of net interest income. This was primarily due to the amortization of negative hedge adjustments from previously active hedges that were closed (de-designated) but where the previously hedged instrument is still outstanding.

Gains on our instruments held under fair value option were mostly driven by the increase in the two year interest rate swap rate, which is a significant valuation input for the shorter-term consolidated obligation bonds for which we elect the fair value option.

Details of the impact on all of these hedging related items are in the table on the following page.

The following table shows the impact of Trading Securities, Derivatives and Hedging Activities, and Instruments Held Under Fair Value Option on our results of operations.

	Advances		Inve	stments	MPF Loans		Discount Notes		Bonds		T	otal

Non-Interest Expense

	Three months end March 31,					
	2015		2014			
Compensation and benefits	\$ 19	\$	16			
Other operating expenses	11		10			
Other	3		4			
Noninterest expense	\$ 33	\$	30			

Compensation and benefits increased as we add employees in order to continue to enhance our member-focused bank capabilities. We also increased staff as we continue to build out the MPF Program platform to support new products such as MPF Direct and MPF Government MBS. We had 408 employees as of March 31, 2015, compared to 370 as of March 31, 2014.

Other operating expenses increased mostly due to information technology, primarily in the area of information technology security, and systems related to the MPF Program and customer relationship management.

Other category improvement is mostly related to our real estate owned (REO) portfolio as a result of foreclosures. As the economy has improved, so have our results on our REO sales.

Other Comprehensive Income (Loss)

	7	Three mon Marc			
	- 2	2015	2014		
Net unrealized gain (loss) on available-for-sale securities	\$	(22)	\$ 55		
Non-credit OTTI on held-to-maturity securities		13	14		
Net unrealized gain (loss) on cash flow hedges		(28)	21		
Post-retirement plans		(8)	1		
Other comprehensive income (loss)	\$	(45)	\$ 91		

Net unrealized gain (loss) on available-for-sale securities

The net unrealized loss for the three months ended March 31, 2015 resulted primarily from the reversal of AOCI related to available-for-sale securities that prepaid during the period. We still have a substantial unrealized gain position remaining in our AOCI related to our AFS securities portfolio. This remaining unrealized gain position will only be realized into net income if we sell our AFS securities before maturity. If we do not sell these securities, the gains will eventually reverse to zero within AOCI as they mature or prepay.

Non-credit OTTI on held-to-maturity securities

Over the past several years, we have accreted back into the carrying amount of these securities a portion of the previously incurred non-credit OTTI recorded during the financial crisis. As these securities approach maturity, we expect these unrealized non-credit losses to continue to reverse as principal and interest from the securities are received over time. We also expect the rate of accretion to decline as these securities approach maturity unless there is any further credit-related impairment.

Net unrealized gain (loss) on cash flow hedges

The net unrealized loss on cash flow hedges is due to a small decrease in long term interest rates. Our cash flow hedges are more sensitive to changes in longer term rates than changes to shorter term rates. We have a substantial unrealized loss position in AOCI related to these cash flow hedges.

Post-retirement plans

The unrealized loss in the post-retirement plans for the three months ended March 31, 2015, is due to a revision to the mortality tables we use for our post-retirement healthcare and supplemental defined benefit equalization plan. We do not expect this to be a recurring event and, as this effect is amortized over a period of several years, we expect its impact to our results of operations to be immaterial.

For further information on all of the above activity in Other Comprehensive Income (Loss) see **Note 12 - Accumulated Other Comprehensive Income (Loss)** to the financial statements.

Statements of Condition

Total capital		4,579		4,525
Total liabilities and capital	\$	70,147	\$	71,841

Cash and due from banks, interest bearing deposits, Federal Funds sold, and securities purchased under agreements to resell

Amounts held in these accounts will vary each day based on the following:

- · Interest rate spreads between Federal Funds sold and securities purchased under agreements to resell and our debt;
- · Liquidity requirements;
- · Counterparties available; and
- Collateral availability on securities purchased under agreements to resell.

Our liquidity position was relatively unchanged, as we continue to take advantage of the very low interest rates in the market by issuing debt in the form of short term discount notes and investing it in short term liquid assets.

Investment Securities

We are required to obtain FHFA approval for any new investments that have a term to maturity in excess of 270 days until such time as our MBS portfolio is less than three times our total regulatory capital and our advances represent more than 50% of our total assets. At March 31, 2015, our MBS portfolio was 3.87 times our total regulatory capital and our advances represented 46% of our total assets, thus we expect our portfolios to continue to decline over time as a result of this limitation.

Advances

Member demand for advances decreased slightly in 2015 after a significant increase in advances during 2014. The increase in 2014 was the result of members taking advantage of the benefits of our Reduced Capitalization Advance Program (RCAP) to lower their cost of borrowing. See **Reduced Capitalization Advance Program** on page 54 in the 2014 Form 10-K for further information. We have a significant funding long-term commitment with a member that contributes to the still historically high level of outstanding advances. While our advances decreased only slightly so far in 2015, it is possible that our advances may decrease more to the extent our members elect to utilize alternative funding resources.

MPF Loans Held in Portfolio, Net

MPF Loans continued to decline as expected, a result of our past business strategy to limit the concentration of our MPF Loan portfolio relative to our total assets. We have begun to explore adding new MPF Loans to our portfolio, in addition to our MPF off-balance sheet products where we buy and concurrently resell MPF Loans to other third party investors or securitize MPF Loans into MBS. We do not expect these new MPF Loans in the near-term to be material on our balance sheet but may become so over a longer-term period of time.

Liquidity, Funding, & Capital Resources

Liquidity

For the period ending March 31, 2015, we have maintained a liquidity position in accordance with FHFA regulations and guidance, and policies established by our Board of Directors. Based upon our excess liquidity position described below, we anticipate remaining in compliance with our liquidity requirements. See **Liquidity, Funding, & Capital Resources** on page 49 in our 2014 Form 10-K for a detailed description of our liquidity requirements.

We use different measures of liquidity as follows:

Overnight Liquidity – Our policy requires us to maintain overnight liquid assets at least equal to 3.5% of total assets. As of March 31, 2015, our overnight liquidity was \$8.0 billion or 11% of total assets, giving us an excess overnight liquidity of \$5.5 billion.

Deposit Coverage – To support our member deposits, FHFA regulations require us to have an amount equal to the current deposits invested in obligations of the U.S. Government, deposits in eligible banks or trust companies, or advances with maturities not exceeding five years. As of March 31, 2015, we had excess liquidity of \$36.3 billion to support member deposits.

Contingency Liquidity – The cumulative five business day liquidity measurement assumes there is a localized credit crisis for all FHLBs where the FHLBs do not have the ability to issue new consolidated obligations or borrow unsecured funds from other sources (e.g., purchasing Federal Funds or customer deposits). Our net liquidity in excess of our total uses and reserves over a cumulative five-business-day period was \$20.6 billion as of March 31, 2015.

In addition to the liquidity measures discussed above, FHFA guidance requires us to maintain daily liquidity through short-term investments in an amount at least equal to anticipated cash outflows under two different scenarios. We may fund overnight or shorter term investments and advances with discount notes that have maturities that extend beyond the maturities of the related investments or advances. For a discussion of how this may impact our earnings, see page 23 in the **Risk Factors** section of our 2014 Form 10-K.

Funding

Conditions in Financial Markets

During the first quarter of 2015, Treasury rates fell. The 10 year treasury fell by 25 basis points ending at 1.92 percent. The market continues to wait for increases in the Federal Funds rate. We continued to have ready access to funding during the quarter.

Cash flows from operating activities

Our operating assets and liabilities support our mission to provide our member shareholders competitively priced funding, a reasonable return on their investment in our capital stock, and support for community investment activities. Operating assets and liabilities can vary significantly in the normal course of business due to the amount and timing of cash flows, which are affected by member-driven activities and market conditions. We believe cash flows from operations, available cash balances and our ability to generate cash through short- and long-term borrowings are sufficient to fund our operating liquidity needs. Net cash provided by (used in) operating activities was \$121 million for the three months ended March 31, 2015. This resulted from net income adjusted for non-cash adjustments, which primarily is attributable to a positive net change in accrued interest payable from the prior quarter.

Cash flows from investing activities

Our investing activities predominantly include advances, MPF Loans held for investment, investment securities, and other short-term interest-earning assets. Net cash provided by (used in) investing activities was \$2.9 billion for the three months ended March 31, 2015. This resulted primarily from a net decrease in securities purchased under agreements to resell, maturities related to held-to-maturity and available-for-sale investment securities, and principal collected on MPF Loans held in portfolio, partially offset by a net increase in federal funds sold. The shift away from investment securities is consistent with our objective to transition to making advances to our members our primary business.

Cash flows from financing activities

Our financing activities primarily reflect cash flows related to issuing and repaying consolidated obligations. Net cash provided by (used in) financing activities was \$(1.9) billion for the three months ended March 31, 2015. This was primarily driven by paydowns in excess of issuances related to both our consolidated obligation bonds and consolidated obligation discount notes.

Consolidated Obligation Bonds and Discount Notes

We fund our assets principally with consolidated obligations (bonds and discount notes) issued through the Office of Finance, and capital stock. Consolidated obligations have GSE status although they are not obligations of the United States and the United States does not guarantee them.

Shorter term discount notes and longer term bonds decreased during the first three months of 2015 due to a lack of need in funding as our overall asset portfolio decreased. For the comparable period in 2014, shorter term discount notes declined significantly as we issued more attractively-priced, longer-termed consolidated obligation bonds.

The following shows our net cash flow issuances (redemptions) by type of consolidated obligation:

Three months ended March 31,	2015	2014
Discount notes	\$ (583)	\$ (4,201)
Bonds	(1,294)	7,056
Total consolidated obligations	\$ (1,877)	\$ 2,855

Subordinated Notes

On March 30, 2015, Standard & Poor's Ratings Services lowered its subordinated debt rating on our subordinated notes to 'A' from 'AA-'. Our long-term/short-term credit ratings remain unchanged by S&P, at AA+/Stable/A-1+.

Our subordinated notes mature on June 13, 2016, and the above ratings change had no significant impact.

Capital Resources

Capital Rules

Under our Amended and Restated Capital Plan of the Federal Home Loan Bank of Chicago, effective as of July 1, 2013 (Capital Plan), our stock consists of two sub-classes of stock, Class B1 stock and Class B2 stock (together, Class B stock), both with a par value of \$100 and redeemable on five years' written notice, subject to certain conditions. Under the Capital Plan, each member is required to own capital stock in an amount equal to the greater of a membership stock requirement or an activity stock requirement. Class B1 stock is available for purchase only to support a member's activity stock requirement. Class B2 stock is available to be purchased to support a member's membership stock requirement and any activity stock requirement.

Under our Capital Plan, our Board of Directors may set a threshold of between \$5 million and \$250 million on the amount of Class B2 stock that would otherwise be held for membership if a member has advances outstanding that have an activity stock requirement in excess of the threshold amount. In that case, the amount of Class B2 stock that exceeds such threshold and is necessary to support advance activity is automatically converted into Class B1 stock. This threshold is currently set at \$5 million, which means that we will convert to Class B1 capital stock any capital stock supporting advances that exceeds the lesser of the member's membership requirement or \$5 million.

The Board of Directors may periodically adjust members' activity stock requirement for certain new advances within a range of 2% and 6% of a member's outstanding advances. Our Board implemented this provision through a Reduced Capitalization Advance Program (RCAP) as further discussed below. Each member's activity stock requirement remains at 5% for non-RCAP advances.

Our initial Capital Plan membership stock requirement was the greater of either \$10,000 or 1.0% of a member's mortgage assets, subject to adjustment by the Board within a range of 0.5% to 2% of a member's mortgage assets. In January 2015, the Board reduced this membership stock requirement to the greater of either \$10,000 or 0.85% of a member's mortgage assets. A member's investment in membership stock is subject to a cap equal to the lesser of (1) a dollar cap set by the Board within a range of \$25 million and \$250 million, and (2) 9.9% of our total capital stock outstanding as of the prior December 31. In January 2015, the Board reduced the dollar cap on membership stock from \$250 million to \$75 million, which is less than 9.9% of the Bank's total capital stock at December 31, 2014 and thus the operative cap during 2015 unless the Board sets a new cap.

Membership stock requirements will continue to be recalculated annually, whereas the activity stock requirement and any automatic conversion of Class B2 stock to Class B1 stock related to the threshold will apply on a daily basis. We implemented the revised membership stock requirements discussed above during our annual recalculation in April 2015, using each member's mortgage assets as of December 31, 2014. More than 600 of our members directly benefited from that reduced requirement as we enabled them to request repurchase of their stock to redeploy the capital in their businesses and their communities. As of April 30, 2015, we have repurchased \$168 million in excess capital stock resulting from these reduced membership stock requirements.

We may only redeem or repurchase capital stock from a member if, following the redemption or repurchase, the member continues to meet its minimum investment requirement and we remain in compliance with our regulatory capital requirements discussed below.

Members that withdraw from membership must wait at least five years after their membership was terminated and all of their capital stock was redeemed or repurchased before being readmitted to membership in any FHLB.

Under the terms of our Capital Plan, our Board of Directors is authorized to amend the Capital Plan, and the FHFA must approve all such amendments before they become effective.

Minimum Capital Requirements

For details on our minimum capital requirements, see **Note 11 - Capital** to the financial statements. As of the date of this filling, we have managed our capital base and assets to remain in compliance with our minimum capital requirements.

Capital Amounts

The following table reconciles our capital reported in our statements of condition to the amount of capital stock reported for regulatory purposes. MRCS is included in the calculation of the regulatory capital and leverage ratios but is recorded as a liability in the statements of condition.

	March 31, 2015	D	ecember 31, 2014	Change
Capital stock	\$ 1,923	\$	1,902	\$ 21
Total retained earnings	2,484		2,406	78
Total permanent capital	4,407		4,308	99
Accumulated other comprehensive income (loss)	172		217	(45)
Total GAAP capital	\$ 4,579	\$	4,525	\$ 54
Capital Stock	\$ 1,923	\$	1,902	\$ 21
MRCS	9		9	_
Total retained earnings	2,484		2,406	78
Regulatory capital	\$ 4,416	\$	4,317	\$ 99

Although we have had no OTTI in 2015, credit deterioration may negatively impact our remaining private-label MBS portfolio. We believe that future impairments of this portfolio are possible if unemployment rates, default, delinquency, or loss rates on mortgages were to increase, or there is a further decline in residential real estate value. We cannot predict if or when such impairments will occur, or the impact such impairments may have on our retained earnings and capital position. See page 28 of the **Risk Factors** section of our 2014 Form 10-K.

We may not pay dividends if we fail to satisfy our minimum capital and liquidity requirements under the FHLB Act and FHFA regulations.

On April 28, 2015, our Board of Directors declared a cash dividend at an annualized rate of 2.25% per share of Class B1 activity stock and 0.50% per share of Class B2 membership stock, based on our preliminary financial results for the first quarter of 2015. Although we continue to work to maintain our financial strength to support a reasonable dividend, any future dividend determination by our Board will be at our Board's sole discretion and will depend on future operating results, our Retained Earnings and Dividend Policy and any other factors the Board determines to be relevant.

For further information about our Retained Earnings and Dividend Policy, see **Retained Earnings and Dividend Policy** on page 57 in our 2014 Form 10-K.

We continue to allocate 20% of our net income each quarter to a restricted retained earnings account in accordance with the Joint Capital Enhancement Agreement that we entered into with the other FHLBs, as further discussed in **Joint Capital Enhancement Agreement** on page F-45 in our 2014 Form 10-K.

Critical Accounting Policies

The table below identifies our critical accounting policies and estimates and the page number where a detailed description of each can be found in our 2014 Form 10-K.

Overnight Indexed Swaps (OIS)	Page 60
Estimating Fair Value	Page 60
Joint and Several Liability	Page 61
Other-Than-Temporary Impairment (OTTI)	Page 62
Significant Inputs Used On All Residential Private-Label MBS Securities	Page 62

Significant changes in our critical accounting policies from our 2014 Form 10-K are outlined below. Also see Note 2 - Summary of Significant Accounting Policies and Note 3 - Recently Issued but Not Yet Adopted Accounting Standards to the financial statements for the impact of changes in accounting policies and recently issued accounting standards on our financial results.

Overnight Indexed Swaps (OIS)

We started using the OIS curve to determine the fair value of our derivative contracts in the first quarter of 2015. The initial effect of using the OIS curve did not have a material effect on our operating activities or financial statements.

Risk Management - Credit Risk

Unsecured Short-Term Investments Credit Exposure

We face credit risk on our unsecured short-term investment portfolio that we maintain to provide funds to meet the credit needs of our members and to maintain liquidity. See **Liquidity** on page 47 for a discussion of our liquidity management. Our policy permits unsecured credit investments that can have maturities up to nine months and can consist of commercial paper, certificates of deposit, and Federal Funds sold.

We actively monitor our credit exposure and the credit quality of each counterparty, including an assessment of each counterparty's financial performance, capital adequacy, sovereign support and the current market perceptions of the counterparty. General macro-economic, political and market conditions may also be considered when deciding on unsecured exposure. As a result of this monitoring activity, we may limit or suspend existing unsecured credit limits.

We do not invest in financial instruments issued by non-U.S. entities (other than those issued by U.S. branches and agency offices of foreign commercial banks) as we are prohibited from doing so by FHFA regulations. Our unsecured credit exposures to U.S. branches or agency offices of foreign commercial banks include the risk that, as a result of political or economic conditions in a country, the counterparty may be unable to meet their contractual repayment obligations. Our unsecured credit exposures to domestic counterparties and U.S. subsidiaries of foreign commercial banks include the risk that these counterparties have extended credit to foreign counterparties.

The following table presents the credit ratings of our unsecured investment credit exposures by the domicile of the counterparty or the domicile of the counterparty's parent for U.S. branches and agency offices of foreign commercial banks. This table does not reflect the foreign sovereign government's credit rating. The unsecured investment credit exposure presented in the table may not reflect the average or maximum exposure during the period as the table reflects only the balances at period end.

As of March 31, 2015	AA		A		Unrated	Total
Domestic U.S Interest-Bearing Deposits	\$	_	\$	560	\$ —	\$ 560
Domestic U.S Fed Funds Sold		_		_	22	22
U.S. branches and agency offices of foreign commercial banks:						
Canada - Fed Funds Sold		250		1,500	_	1,750
Sweden - Fed Funds Sold		_		500	_	500
Netherlands - Fed Funds Sold		_		400	_	400
Finland - Fed Funds Sold		350		_	_	350
Total unsecured credit exposure	\$	600	\$	2,960	\$ 22	\$ 3,582

In the above table no investments were longer than of overnight duration; \$582 million were with members.

Investment Securities

We hold a variety of investment securities we believe are low risk and mostly government backed or insured such as GSE debt, and FFELP ABS. There was no material change in the credit ratings of these AA or better rated securities since December 31, 2014, and except for private-label MBS as noted below, we have never taken an impairment charge on these securities. For further details see page 66 in our 2014 Form 10-K.

Our private label MBS are predominantly variable rate securities rated below investment grade BBB. There was no material change in overall credit quality since December 31, 2014, nor have we acquired any new private label MBS. We had no other-than-temporary impairment (OTTI) losses to date in 2015. For further details see page 69 in our 2014 Form 10-K.

The following table presents the components of amortized cost of our private label MBS (whether or not impaired), and where applicable, the life-to-date OTTI credit impairment taken over time on some of these securities. For further details, see **Note 5 - Investment Securities - Other-Than-Temporary Impairment Analysis** to the financial statements.

As of March 31, 2015	Un	Unpaid Principal Balance		Life-To-Date OTTI Credit Impairment ^a		Adjustments ^b	Amortized Cost		
Private label MBS	<u> </u>	1.798	\$	(742)	\$	280	\$	1.336	

Life-to-date OTTI credit impairment excludes certain adjustments, such as increases in cash flows expected to be collected that have been recognized into net income.

Other Adjustments primarily consists of principal shortfalls and life-to-date accretion of interest related to the discounted present value of previously recognized credit-related impairment losses.

Member Credit Outstanding

The following table presents the number of borrowers and credit outstanding to our borrowers by rating. Our internal rating reflects our assessment of the default risk associated with a member rather than the risk of loss on the credit outstanding. We manage our credit risk through collateral controls and, based on our risk rating, increase over-collateralization requirements as a member deteriorates. As a result, we have never suffered a credit loss from a member default. Credit outstanding consists primarily of outstanding advances and letters of credit. MPF credit enhancement obligations, member derivative exposures, and other obligations make up the rest. Collateral loan value describes the borrowing capacity assigned to the types of collateral we accept for advances. Collateral loan value does not imply fair value. Of the total credit outstanding, \$31.9 billion were advances and \$5.0 billion were letters of credit at March 31, 2015, compared to \$32.5 billion and \$3.6 billion at December 31, 2014.

March 31, 2015							December 31, 2014						
Rating	Number of Borrowers	% of Total	Credit Outstanding	% of Collateral Total Loan Value		Number of Borrowers	% of Total	Ou	Credit tstanding	% of Total			
1-3	474	93%	\$ 36,504	99%	\$	84,900	481	92%	\$	35,651	98%	\$	76,797
4	12	2%	146	- %		354	15	3%		183	1%		331
5	23	5%	212	1%		318	25	5%		240	1%		388
Total	509	100%	\$ 36,862	100%	\$	85,572	521	100%	\$	36,074	100%	\$	77,516

The majority of borrowers assigned a 4 rating in the above table were required to submit specific collateral listings and the majority of borrowers assigned a 5 rating were required to deliver collateral to us or a third-party custodian on our behalf.

As a result of the collateral and other credit risk mitigation efforts, we believe our credit outstanding is sufficiently well collateralized and we have not recorded an allowance for credit losses on our advances or other credit products in the periods presented.

MPF Loans

Our allowance declined in 2015 compared to 2014 primarily as a result of change in regulation by AB 2012-02, for further details see **Note 2 - Summary of Significant Accounting Policies** to the financial statements. For details on our allowance for credit losses, please see **Note 8 - Allowance for Credit Losses** to the financial statements.

Mortgage Repurchase Risk

We are exposed to mortgage repurchase risk in connection with our sale of MPF Loans to Fannie Mae under the MPF Xtra product, to third party investors under the MPF Direct product, and to Ginnie Mae for MPF Loans securitized in Ginnie Mae MBS. If a loan eligibility requirement or other warranty is breached, these third parties could require us to repurchase the ineligible MPF Loan or provide an indemnity. We may require the PFI from which we purchased the ineligible MPF Loan to repurchase that loan from us or indemnify us for related losses. Under the MPF Direct product, if a PFI is insolvent, our repurchase liability is limited to a PFI's failure to deliver the required loan documentation and excludes repurchases for breaches of loan level representations and warranties. In addition, if we purchased the ineligible MPF Loan from a PFI of another MPF Bank, the MPF Bank will indemnify us for any losses we may incur.

For the three months ended March 31, 2015, we have repurchased \$9 million, of unpaid principal balances related to MPF Xtra loans sold to Fannie Mae. These repurchases represent repurchase requests that have been resolved during the reporting period. Due to recoveries from PFIs we incurred no material losses on these loans. As of March 31, 2015, we have \$51 million of unpaid principal with respect to mortgage loans that represent unresolved claims with Fannie Mae, in which a repurchase demand may occur; see **Note 14 - Commitments and Contingencies** to the financial statements. Due to the minimal volume of MPF Loans purchased under the MPF Direct product, we did not estimate any mortgage repurchase liability with respect to MPF Government MBS loans since no MPF Loans were pooled into securities guaranteed by Ginnie Mae under the MPF Government MBS product as of March 31, 2015.

For further details, see Mortgage Repurchase Risk on page 74 in our 2014 Form 10-K.

Derivative counterparties

We transact most of our derivatives with large banks and major broker-dealers. Derivative transactions may be either over-the-counter with a counterparty (bilateral derivatives) or over-the-counter cleared through an FCM with a derivatives clearing organization (clearinghouse).

We are subject to credit risk due to the risk of nonperformance by counterparties to our derivative agreements. The amount of credit risk on derivatives depends on the extent to which netting procedures, collateral requirements and other credit enhancements are used and are effective in mitigating the risk. We manage credit risk through credit analysis, collateral management and other credit enhancements. We are also required to follow the requirements set forth by applicable regulation.

Bilateral Derivatives. We are subject to credit risk due to nonperformance by counterparties to derivative agreements. We require collateral on bilateral derivative agreements. The amount of net unsecured credit exposure that is permissible with respect to a counterparty depends on the credit rating of that counterparty. The counterparty must deliver collateral to us if the total market value of our exposure to that counterparty rises above a specific trigger point. As a result of these risk mitigation initiatives, we do not anticipate any credit losses on our bilateral derivative agreements with counterparties as of March 31, 2015.

Cleared Derivatives. We are subject to credit risk due to nonperformance by the clearinghouse. The requirement that we post initial and variation margin through the FCM, on behalf of the clearinghouse, exposes us to institutional credit risk in the event that the FCM or the clearinghouse fails to meet their obligations. Clearing derivatives through a clearinghouse mitigates counterparty credit risk exposure because individual counterparties are replaced by the central clearinghouse counterparty and collateral is posted daily for changes in the value of cleared derivatives. We do not anticipate any credit losses on our cleared derivatives as of March 31, 2015.

The contractual or notional amount of derivative agreements reflects our involvement in the various classes of financial instruments. Our maximum credit risk with respect to derivative agreements is the estimated cost of replacing interest-rate swaps, forward agreements and purchased caps and floors if the counterparty defaults, minus the value of any related collateral. In determining maximum credit risk, we consider, with respect to each counterparty, accrued interest receivables and payables as well as the legal right to net assets and liabilities.

The following table presents our derivative positions with credit exposure. Rating used was the lowest rating among the three largest NRSROs. Non-cash collateral pledged consists of initial margin we posted through our FCMs, on behalf of the clearinghouses for cleared derivatives.

	Net Derivatives Fair Value Before Collateral		Cash Collateral Pledged		Non-cash Collateral Pledged	Net Credit Exposure to Counterparties

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Measurement of Market Risk Exposure

To measure our exposure, we discount the cash flows generated from modeling the terms and conditions of all interest rate-sensitive securities using current interest rates to determine their fair values or spreads to the swap curve for securities where third party prices are used. This includes considering explicit and embedded options using a lattice model or Monte Carlo simulation. We estimate yield curve, option, and basis risk exposures by calculating the fair value change in relation to various parallel changes in interest rates, implied volatility, prepayment speeds, spreads to the swap curve and mortgage rates.

The table below summarizes our sensitivity to various interest rate risk exposures in terms of changes in market value.

		Option Risk					Basis Risk			
	Yield Curve Risk			Implied Volatility	Prepayment Speeds		Spread to Swap Curve	Mortgage Spread		
As of March 31, 2015										
Advances	\$	(3)	\$	_	\$	_	\$ (10)	\$ <u> </u>		
MPF Loans		(1)		(2)		(4)	(2)	1		
Mortgage Backed Securities		(6)		(1)		(1)	(7)	_		
Other interest earning assets		(1)		_		_	(3)	_		
Interest-bearing liabilities		8		8		_	8	<u> </u>		
Derivatives		3		(5)		_	_	_		
Total	\$	_	\$		\$	(5)	n/m	\$ 1		
As of December 31, 2014										
Advances	 \$	(3)	\$	_	\$	_	\$ (11)	\$ —		
MPF Loans		(1)		(3)		(3)	(2)	1		
Mortgage Backed Securities		(6)		(1)		(1)	(7)	_		
Other interest earning assets		(1)		_		_	(4)			
Interest-bearing liabilities		10		12		_	9	_		
Derivatives		2		(9)		_				
Total	\$	1	\$	(1)	\$	(4)	n/m	\$ 1		

n/m Spread movements to the swap curve within each category are independent of the other categories and therefore a total is not meaningful.

Yield curve risk - Change in market value for a one basis point parallel increase in the swap curve.

Option risk (implied volatility) - Change in market value for a one percent parallel increase in the swaption volatility.

Option risk (prepayment speeds) - Change in market value for a one percent increase in prepayment speeds.

Basis risk (spread to swap curve) - Change in market value for a one basis point parallel increase in the spread to the swap curve.

Basis risk (mortgage rates) - Change in market value for a one basis point increase in mortgage rates.

As noted in the above table, our sensitivity to changes in implied volatility was zero as of March 31, 2015, compared to \$(1) million at December 31, 2014. These sensitivities are limited in that they do not incorporate other risks, including but not limited to, non-parallel changes in yield curves, implied volatility, prepayment speeds, and basis risk related to differences between the swap and the other curves. Option positions embedded in our mortgage assets and callable debt impact our yield curve risk profile, such that swap curve changes significantly greater than one basis point cannot be linearly interpolated from the table above.

Duration of equity is another measure to express interest rate sensitivity. We report the results of our duration of equity calculations to the FHFA each quarter. We measure duration of equity in a base case using the actual yield curve as of a specified date and then shock it with an instantaneous shift of the entire curve. The following table presents the duration of equity reported by us to the FHFA in accordance with the FHFA's guidance, which prescribes that down and up interest-rate shocks equal 200 basis points. However, the applicable regulation restricts the down rate from assuming a negative interest rate. Therefore, we adjust the down rate accordingly in periods of very low levels of interest rates. The results are shown in years of duration equity.

	As of March 31, 2015	5	As	of December 31, 201	4
Down 200 bps	Base	Up 200 bps	Down 200 bps	Base	Up 200 bps
3.5	0.5	0.3	3.2	-0.3	0.2

Duration gap is another measure of interest rate sensitivity. Duration gap is calculated by dividing the dollar duration of equity by the fair value of assets. A positive duration gap indicates an exposure to rising interest rates. As of March 31, 2015, our duration gap was 0.5 months, compared to -0.2 months as of December 31, 2014.

As of March 31, 2015, on a U.S. GAAP basis, our fair value surplus (relative to book value) was \$558 million, and our market value of equity to book value of equity ratio was 112%. At December 31, 2014, our fair value surplus was \$618 million and our market value of equity to book value of equity ratio was 114%. The reduction in market value to book value was driven by the increase in our capital and the gradual pay down of assets at a fair value premium to book value that were replaced by assets at cost. This is a trend that is expected to continue.

Our Asset/Liability Management Committee provides oversight of risk management practices and policies. This includes routine reporting to senior management and the Board of Directors, as well as maintaining the Market Risk Policy, which defines our interest rate risk limits. The table below reflects the change in market risk limits under the Market Risk Policy.

	March 31,	i		December 31, 2014				
Scenario as of	ige in Market ue of Equity	Loss Limit			Change in Market Value of Equity		Loss Limit	
-200 bp	\$ 204.1	\$	(185.0)	\$	118.6	\$	(185.0)	
-100 bp	98.7		(77.5)		28.5		(77.5)	
-50 bp	38.7		(30.0)		(0.6)		(30.0)	
-25 bp	15.9		(15.0)		(2.4)		(15.0)	
+25 bp	(4.9)		(30.0)		4.1		(30.0)	
+50 bp	(6.4)		(60.0)		9.2		(60.0)	
+100 bp	(6.3)		(155.0)		12.9		(155.0)	
+200 bp	(22.0)		(370.0)		7.0		(370.0)	

Item 4. Controls and Procedures.

Disclosure Controls and Procedures

Under the supervision and with the participation of management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, as of the end of the period covered by this report (the Evaluation Date). Based on this evaluation, the principal executive officer and principal financial officer concluded as of the Evaluation Date that the disclosure controls and procedures were effective such that information relating to us that is required to be disclosed in reports filed with the SEC (i) is recorded, processed, summarized, and reported within the time periods specified in SEC rules and forms, and (ii) is accumulated and communicated to management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

For the current year quarter presented in this Form 10-Q, there were no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Consolidated Obligations

Our disclosure controls and procedures include controls and procedures for accumulating and communicating information relating to our joint and several liability for the consolidated obligations of other FHLBs. For further information, see **Item 9A. Controls and Procedures** on page 85 of our 2014 Form 10-K.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings.

On October 15, 2010, the Bank instituted litigation relating to 64 private label MBS bonds purchased by the Bank in an aggregate original principal amount of \$4.29 billion. The litigation was brought in state court in the states of Washington, California and Illinois. The Washington action has been resolved and was dismissed with prejudice on December 5, 2013. The California action has been resolved and was dismissed with prejudice on January 27, 2014. The Illinois action, which currently relates to 15 private label MBS bonds with an aggregate original principal amount of \$950 million, is proceeding in discovery.

In the Illinois action, the Bank asserts claims for untrue or misleading statements in the sale of securities, signing or circulating securities documents that contained material misrepresentations, and negligent misrepresentation. The Bank seeks the remedies of rescission, recovery of damages, and recovery of reasonable attorneys' fees and costs of suit. As of April 30, 2015, defendants in the Illinois litigation include the following entities and affiliates thereof: American Enterprise Investment Services, Inc.; Ameriprise Financial Services, Inc.; Goldman Sachs & Co.; RBS Securities Inc.; Sand Canyon Acceptance Corporation; and Morgan Stanley & Co., Incorporated.

The Bank may also be subject to various other legal proceedings arising in the normal course of business. After consultation with legal counsel, management is not aware of any other proceedings that might have a material effect on the Bank's financial condition or results of operations.

Item 1A. Risk Factors.

In addition to the information presented in this report, readers should carefully consider the factors set forth in the **Risk Factors** section on page 19 in our 2014 Form 10-K, which could materially affect our business, financial condition, or future results. These risks are not the only risks facing us. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial may also severely affect us.

Federal Home Loan Bank of Chicago

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Not applicable.

Item 3. Defaults Upon Senior Securities.
